CINETENSION2

A Built-In Infrared & Radio Frequency Receiver supports your Screens On-wall or In-Ceiling application for a clean appearance.

Standard built-In Low Voltage Controller (LVC), a 12V trigger port can be connected to your projector Trigger point, this enables synchronization between the drop/rise cycle of your screen and the power cycle of the projector. You could extend this port using a standard RJ45 connector and CAT-5 cable to anywhere in the room. Or mount your Wall-switch like a regular light Switch.

CINETENSION2

Cinetension2 Series screens come with black 4"-10" top masking border with side and bottom masking. To enhance the format of you presentation to avoid projection overshoot.

You can also adjust the screen's vertical drop/rise limits for optimal visibility. Please contact our Tech-support for more information about this feature.

Optional 11"x 4" and 12"x 8" L brackets can allow more flexibility when installing the screen away from wall. Please contact your reseller or visit [shop.elitescreens.com](http://shop.elitescreens.com) for accessory parts.

Optional Elite ZR800D Universal Learning Remote Control, allows one-touch regulation over your entertainment system managing up to 8 devices simultaneously. Each unit has a simplified programming option with learning function to accompany 800 pre-programmed TV/DVD/VCR codes.

CineWhite Screen Material has a wide viewing Angle in 1.1 Gain, suitable for most applications including commercial presentations and home theater viewing.

PowerGain Enhances the color reproduction with low output/high resolution projectors or with the presence of ambient light.

CineGrey is best for those who are using low contrast ratio (LCD) projectors with a need to increase the contrast ratio and improve picture black levels.
